AKSHADA MANE

SUMMARY

Computer Science graduate with hands-on experience in coding, basic web development, and database management. Passionate about technology and eager to contribute to innovative projects while continuously enhancing technical and professional skills.

PROJECTS

Emergency Ambulance Hiring Project

Developed a web-based emergency ambulance hiring system using PHP and MySQL to enable quick and efficient ambulance booking during critical situations. The application allows users to check ambulance availability, place booking requests, and receive confirmations, while administrators can manage users, ambulances, and booking records through a centralized dashboard.

Luggage Booking Project

Luggage Booking System: Designed and developed a web-based luggage booking system using Python and the Django framework to allow users to book luggage transport services easily. The application supports user registration, luggage booking, order tracking, and status updates, with an admin panel to manage bookings and user data.
